Create a deal with digital assets (two users)

According to the statistics, at the moment there are more than 1500 different kinds of digital currency on completely different algorithms. Secure trading of digital assets only exists on well-known exchanges. However, desired currencies cannot be found on all exchanges, and the prices may vary from site to site.

When trading digital assets directly between users, there is no assurance that you will receive your coins (tokens)!

Create a deal with digital assets (two users)

TITLE DEAL

EMAIL

ADDRESS TO RECEIVE

RETURN ADDRESS FOR ABORT, CHANGE

NUMBER OF CONFIRMATION

DEAD LINE: 17 DECEMBER 2018, 11:00 UTC

MESSAGE

I SEND: MYRIAD (XMY) ▼

6000000

I RECEIVE: ETHEREUM (ETH) ▼

81

CANCEL GENERATE LINK

* after generating the link, two Deposit addresses XMY and ETH will be created, when the specified amounts are received for both deposits and 10 confirmations in both networks, the transaction will take place and the required amounts will be sent to the specified addresses. Otherwise, all amounts will be sent back.

Supported by Vionix

Our first service (digital transaction) allows you to create a deposit addresses for the private exchange of digital assets. Suppose that you have 100,000 coins of one denomination and there is a buyer for these coins, you agree on the amount of 20 Litecoins. Create a link through our program with all the conditions and send it to the buyer, after both parties accept the terms, the transaction can be completed. If there is an absence of one of the deposits, the coins(tokens) are returned back to the sender.

This service pervades a convenient way to create a private and secured transaction in a non-market, pre-sale, or exchange of coins(tokens).

Create a multi-payment

In the world of digital assets, there is a frequent need to distribute so-called "airdrops" and "bounties". The number of coins(tokens) to be sent can be very large and the price of sending to each address can be costly and time consuming.

The screenshot shows a dark-themed web interface for creating a multi-payment. On the left, there is a heading "Create a multi-payment with digital assets" in pink. On the right, there are several input fields and a list of addresses. The fields include "TITLE MULTI-PAYMENT", "EMAIL", "RETURN ADDRESS FOR ABORT, CHANGE", and "START DATE: 11 DECEMBER 2018, 11:00 UTC". Below these is a list of six Ethereum addresses labeled "ADDR ETHEREUM 1" through "ADDR ETHEREUM 6". A dropdown menu shows "I SEND: ETHEREUM (ETH)" and a value of "600" is entered. At the bottom right, there are two buttons: "CANCEL" and "GENERATE LINK". A small disclaimer is visible at the bottom left of the interface.

* all specified addresses will be sent to 100 coins (tokens), in case of an incorrect address or an extra Deposit, the change will be returned to the specified address.

Supported by Vionix

Our secure service allows you to make multiple transactions, you only need to input a list of addresses on individual lines, specify a start date for sending and deposit the desired number of coins (tokens), they will be distributed between all addresses, in the case of an incorrect address, the assets for the incorrect address will be returned.

Create Crowdfunding in any digital assets

Crowdfunding has been a thing for a long time, for example in networks like Ethereum, NXT, Lisk, and more, you can create smart contracts with an extended number of options. But most of the coins (tokens) do not contain such functions.

The screenshot shows a dark-themed web interface for creating a crowdfunding campaign. On the left, the title "Create a Crowdfunding with digital assets" is displayed in pink. Below it, a disclaimer states: "* after generating the link, you can share it with anyone, if you set the required amount by softcap, the amount will be transferred to the contract address, if the softcap amount is not collected before the specified date, all the coins(tokens) will be returned back..". On the right, there are several input fields: "TITLE CROWDFUNDING", "EMAIL", "RETURN ADDRESS FOR ABORT, CHANGE", "MESSAGE", and "CONTRACT ADDRESS". Below these fields, the "END DATE" is set to "20 DECEMBER 2018, 11:00 UTC", and the "DIGITAL ASSET" is set to "LOOPRING (LRC)". The "SOFTCAP" is set to "250000". At the bottom right, there are two buttons: "CANCEL" and "GENERATE LINK".

Supported by Vionix

Our third service allows, in simple form, to acquire digital assets on any coins (tokens).

Simply create a contract deposit with our program on the selected asset, specify the conditions: start time, end time, softcap, hardcap, etc.

You will spend less than a minute to create a contract. After creation of the contract, you can send or publish the link on your website. A big plus is until the required softcap is met, the digital assets cannot be spent or used. This insures all collected coins(tokens) will be returned if softcap is not met. Also after the creation of the contract, you will be given access to all extensive statistics on interest and have the ability to vote and view the results.

Stable salary in digital currency

In the world of crypto currency, there is a need for a reliable salary payment of digital asset, there are currently a lot of developers, managers, writers and others working to receive a monthly reward in coins(tokens). But the employer may forget to pay the next amount.

Our fourth service allows you to Deposit the required amount and send it automatically and consistently on the selected day of the month to the address of the employee.
